

Exceedingly Sensitive. Sharply Focused.

The 6500+ QTRAP® System with IonDrive™ System Technology

See What Couldn't Be Seen. Until Now.

The QTRAP® 6500+ system with multi-component IonDrive™ system technology:

- SCIEX fastest and most sensitive Triple Quadrupole and QTRAP® systems
- Improved signal-to-noise over the widest range of flow rates and compounds
- 6 orders of linear dynamic range
- QTRAP enabled MRM³ for enhanced compound selectivity

Gain an additional dimension of selectivity for challenging assays with the SelexION®+ differential mobility separation technology device. Overcome matrix interferences and improve data quality with powerful ion separation that delivers robust quantitative performance.

The SCIEX QTRAP® 6500+ system. The farsighted successor to a long line of industry leading mass spec systems.
